14. N.H. Rev. Stat. Ann. §477:4 a, c, d, g and h Notices and N.H. Rev. Stat. Ann. §485-A:39 Notice:

- a. Radon Gas: Radon gas, the product of decay of radioactive materials in rock may be found in some areas of New Hampshire. This gas may pass into a structure through the ground or through water from a deep well. Testing can establish its presence and equipment is available to remove it from the air or water.
- b. "Arsenic: Arsenic is a common groundwater contaminant in New Hampshire that occurs at unhealthy levels in well water in many areas of the state. Tests are available to determine whether arsenic is present at unsafe levels, and equipment is available to remove it from water. The buyer is encouraged to consult the New Hampshire department of environmental services private well testing recommendations (www.des.nh.gov) to ensure a safe water supply if the subject property is served by a private well."
- c. "PFAS: Poly - and perfluoroalkyl substances (PFAS) are found in products that are used in domestic, commercial, institutional and industrial settings. These chemical compounds have been detected at levels that exceed federal and/or state advisories or standards in wells throughout New Hampshire, but are more frequently detected at elevated levels in southern New Hampshire. Testing of the water by an accredited laboratory can measure PFAS levels and inform a buyer's decision regarding the need to install water treatment systems."
- d. "Flood: Properties in coastal areas and along waterways may be subject to increased risk of flooding over time. A standard homeowners insurance policy typically does not cover flood damage. The buyer is encouraged to determine whether separate flood insurance is required and consult the Federal Emergency Management Agency's flood maps (FEMA.GOV) in order to determine if the property is in a designated flood zone."
- e. Lead Paint: Before 1977, paint containing lead may have been used in structures. The presence of flaking lead paint can present a serious health hazard, especially to young children and pregnant women. Tests are available to determine whether lead is present.
- f. RSA 477:4-c and d, Water Supply, Sewage Disposal and Insulation: Seller has no information.
- g. RSA 477:4-g Methamphetamine Production Site: whether Property was used for methamphetamine production: Seller has no information.

- h. RSA 485-A:39 Waterfront Property Site Assessment Study: Seller has no information.
- i. RSA 477:4-h Public Utility Tariff Pursuant to RSA 374:61: whether Property is subject to a public utility tariff under RSA 374:61: Seller has no information.
