13. Statutory Disclosures. Buyer acknowledges that he has read the following notices, pursuant to RSA 477:4-a, prior to executing this Memorandum of Sale:

Radon: Radon, the product of decay of radioactive materials in rock, may be found in some areas of New Hampshire. Radon gas may pass into a structure through the ground or through water from a deep well. Testing of the air by a professional certified in radon testing and testing of the water by an accredited laboratory can establish radon's presence and equipment is available to remove it from the air or water.

Arsenic: Arsenic is a common groundwater contaminant in New Hampshire that occurs at unhealthy levels in well water in many areas of the state. Tests are available to determine whether arsenic is present at unsafe levels, and equipment is available to remove it from water. The buyer is encouraged to consult the New Hampshire department of environmental services private well testing recommendations (www.des.nh.gov) to ensure a safe water supply if the subject property is served by a private well.

Lead: Before 1978, paint containing lead may have been used in structures. Exposure to lead from the presence of flaking, chalking, chipping lead paint or lead paint dust from friction surfaces, or from the disturbance of intact surfaces containing lead paint through unsafe renovation, repair, or painting practices, or from soils in close proximity to the building, can present a serious health hazard, especially to young children and pregnant women. Lead may also be present in drinking water as a result of lead in service lines, plumbing and fixtures. Tests are available to determine whether lead is present in paint or drinking water.

PFAS: Poly-and perfluoroalkyl substances (PFAS) are found in products that are used in domestic, commercial, institutional and industrial settings. These chemical compounds have been detected at levels that exceed federal and/or state advisories or standards in wells throughout New Hampshire, but are more frequently detected at elevated levels in southern New Hampshire. Testing of the water by an accredited laboratory can measure PFAS levels and inform a buyer's decision regarding the need to install water treatment systems.

Flood: Properties in coastal areas and along waterways may be subject to increased risk of flooding over time. A standard homeowners insurance policy typically does not cover flood damage. The buyer is encouraged to determine whether separate flood insurance is required and consult the Federal Emergency Management Agency's flood maps (FEMA.GOV) in order to determine if the property is in a designated flood zone.

14. Water Supply and Sewage Disposal. Buyer acknowledges that Seller has disclosed, and Buyer has received, the following disclosures pursuant to RSA 477:4-c and 477:4-d prior to executing this Memorandum of Sale:

- (a) Seller is unaware of any information relative to the water supply system used in connection with the Premises.
- (b) Seller is unaware of any information relative to the sewage disposal system used in connection with the Premises.
- (c) Seller is unaware of any information relative to the insulation used in connection with the Premises.
- (d) Seller is unaware of any information relative to the Premises being located in a federally designated flood hazard zone.

15. Construction. This Memorandum of Sale, executed in duplicate, is to be construed in accordance with the laws of the State of New Hampshire, is to take effect as a sealed instrument, sets forth the entire contract between the parties, is binding upon and inures to the benefit of the parties hereto and their respective heirs, devisees, executors, administrators, successors and assigns, and may be canceled, modified or amended only by a written instrument executed by both the Seller and the Buyer. If two or more persons are named herein as Buyer, their obligations hereunder shall be joint and several. The captions and marginal notes are used only as a manner of convenience and are not to be considered a part of this Agreement or to be used in determining the intent of the parties.
